The butterfly valves TITANIA meet the safety requirements of the pressure Equipments Directive 97/23/EC (PED) appendix 1 for fluids of the groups 1 and 2.

Triple offset function:

Offset 1E:

The center of rotation is offset from the tightness surface to allow a total contact around the entire seal.

Offset 2E:

The center of rotation of the disc is offset from the pipe centerline to allow a cleaning opening valve.

Offset 3E:

The third offset issue from the seal cone tilting cancel jamming and friction and allow complete tightness without seal deformation (solid seal).

Tightness:

Bi-directional tightness
Closing without jamming and friction
No deformation on the seal
